Form No WASC283 Iss 1 Dated 05/10/05

Page 1 of 2

Site of Inspection - Stansted	Customer O/No :- JA69825	
Customer :- M Oram C/O Inflite Engineering	W.A.S Job No :- 1xxxxxx	Release Ref :- W182600
Aircraft Type :- BAe 146	Work pack Ref :- WAS/NDT/0836	
A/C Reg :- Ex A6-AAB	Description :- L/H No2 Wing leading edge test section	
P/No: Unknown	S/No: N/K	Qty :- one

Detail of Inspection and Technique:

Ultrasonic inspection carried out on the L/H wing leading edge test section supplied to ascertain the average skin thickness before and after the chemical wash process and also after the triple o coating process being carried out on the test section supplied.

Carried out in accordance with BAe 146 NTM PT 4 20-00-01.

Result of Inspection:

See Attached picture of the supplied test section for the initial thickness measurements
The measurements vary between .072" to .068" of an inch
The test section was re inspected after the chemical wash and coating applied.

There was No discernable reduction in the thickness for the test section found
The measurements still measured between .072" and .068" of an inch.

This report contains the result of the inspection performed by W.A.S (Components) Limited in accordance with your order, and is subject to W.A.S (Components) Limited standard terms and conditions for the supply of these services
